# *Aircrews - Planning*

---

- **Crew Resource Management** – forecasts future crew availability and requirements to determine crew shortfalls and surpluses. The module also helps develop crew movement and hiring plans.
- **Leave Management** - assists with the development of annual leave ballots and the awarding of the ballots, as well as the assignment of other types of leave, such as medical leave, maternity leave etc.
- **Training and Venue Management** - allows the user to set-up detailed training profiles for different movements. The module supports assignment of training duties to both trainees and trainers and tracks the availability of training venues and instructors.

# *AirCrews - Planning*

---

- **Schedule Management** - supports automatic loading and synchronization of flight schedules against current pairings and rosters.
- **Pairing Generation & Optimization** - utilizes advance mathematical techniques to generate highly efficient crew pairings while considering all legality and manpower constraints.
- **Crew Rostering** - provides functionality to assign flying duties, days off, reserve duties, ground duties, and management duties to individual crew.

# *Aircrews* - Tracking

---

- **Crew Tracking and Control** - manages the crew rosters after their publication by tracking all schedule changes, generating alerts due to crew legality violations, and generating notification messages when crew rosters are modified.
- **Crew Internet Access** - allows crew to easily interact with the crew management system via the Internet to input leave and duty preferences, view rosters and notifications, update personal details, etc.
- **AirCrews Database and Administration** –used to store all flight schedule information, deadheading opportunities, crew details, pairing information, crew rosters, airport information, hotel information, rule parameters, etc. Also used to store historical crew qualifications and rosters, generate payroll information, etc.

# eMergo Platform

---

- **In Nov. 2000, Sabre announced a new web-enabled, ASP-based delivery of IT solutions**
- **Ideal for small to mid-size carriers that do not want to invest in hardware and infrastructure support**
- **Billing will be by a monthly access fee**
- **Initially, 17 solutions will be supported on eMergo platform**
- **Over next two years, almost 30 solutions will be hosted**
- **Initial solutions released include *AirFlite* and *AirMax***
- ***AirCrews* will be available by September 2001**
- **Initial launch customer was signed in January 2001**
